# IT'S THE LAW!

## BUSINESS & MULTI-FAMILY RECYCLING

*Assembly Bill AB 341 will require all businesses in California that generate waste to recycle.*

# AB341

## BEGINS JULY 1, 2012

Beginning July 1, 2012, Assembly Bill 341 [AB341] will require all businesses in California that generate 4 or more cubic yards of waste per week and multi-family communities with five or more units to recycle. Participating in a CR&R recycling program will assist your business in meeting the new recycling requirement. Businesses may also donate, sell and/or self-haul materials to a recycling facility. Information about California's business recycling requirements is available from the California Department of Resources Recycling and Recovery [CalRecycle] at calrecycle.ca.gov/climate/recycling.

### SOURCE SEPARATED RECYCLING

Your business may generate a large amount of one type of recyclable material, such as cardboard. CR&R can help you determine the best container for your needs based on the quantity and type of material.

### LEED PROGRAM

LEED, or Leadership in Energy and Environmental Design, is an internationally recognized green building certification system. CR&R is prepared to help you meet your construction based LEED goals. We are flexible enough to work with you on all building types—commercial as well as residential. To start your commercial recycling program, please contact our CR&R Customer Service.

**WASTE AND RECYCLABLES ARE COLLECTED AND TRANSPORTED TO THE MRF.**

### CR TRANSFER MRF

In Stanton, CR&R will do the recycling for you at our Material Recovery Facility [MRF]. We will collect your waste and transport it to our MRF where we will pull recyclables from your waste stream through a process of manual and mechanical sorting. When your employees don't need to sort your waste, it allows them more time to grow your business.

## RECYCLE PROGRAMS

### BULKY ITEMS

Items that cannot properly fit in your bin, such as a chair or desk, are considered bulky items and require a special pick up. Electronic waste [e-waste] is anything with a circuit board or battery, such as computers, telephones and copiers. White goods [e. g. refrigerators, freezers] and electronic waste cannot be disposed of in your bin. CR&R will collect and properly dispose of and recycle these items. For more information, please call customer service department.

### HAZARDOUS WASTE

Hazardous waste are products that are flammable, corrosive, reactive or toxic. They are dangerous to the public and the environment. It is illegal to dispose of hazardous wastes in your CR&R containers.

For a list of companies that accept business hazardous waste, please visit **oclandfills.com**, click on Hazardous Waste, then click on Business Hazardous Waste referrals.
